Illinois Department of Insurance Urges Consumers to Review Flood Insurance Policies

Department Reminding Homeowners and Renters to Ensure Appropriate Coverage Prior to a Flood

CHICAGO – April 26, 2011. The Illinois Department of Insurance is once again reminding homeowners and renters to prepare in advance for the possibility of floods by reviewing policy coverage and making informed decisions about whether flood insurance is needed.

“This spring season has brought heavy rains and flooding, with more of both certain to come,” said Michael T. McRaith, Director of the Illinois Department of Insurance. “Flood insurance coverage is not included in standard homeowner or renter policies and do not take effect for 30 days, so our Department encourages consumers to determine the limits and benefits of an insurance policy well before damage may occur.”

The Department offers the following flood insurance information for property owners and renters:

- Call your insurance agent or company to inquire about the availability of flood insurance in your area. Keep in mind that flood insurance becomes effective 30 days after it is purchased, so the sooner you talk to your insurance agent or company the better.
- The average flood insurance policy costs a little more than \$400 per year for about \$100,000 of coverage. The actual cost to you will depend on where you live and the amount of coverage you choose.
- Standard flood coverage does not typically cover damage resulting from sewer backups or sump pump issues. Ask your insurance agent or company if such additional coverage is appropriate to add to your policy.
- There are steps you can take before a disaster strikes to make it easier to file and recover insurance claims. For example, homeowners or renters should take an inventory of their personal property and make photocopies of their insurance policies, keeping all such important papers in a secure location away from home. Taking pictures of various rooms and their contents is also a great way to document the contents. A sample home inventory sheet is available at the Department’s website or by clicking [here](#).
